NOTICE OF PROCEEDING AND HEARING

This is NOTICE of a proceeding before the New Mexico Public Regulation Commission. What follows is a summary of the case, an overview of the procedural schedule of the case, and information about how you can participate in the process.

1. On June 28, 2024, Public Service Company of New Mexico (“PNM” or the “Company”) filed with the New Mexico Public Regulation Commission (“NMPRC” or “Commission”) its Application for approval of the continuation of PNM’s hedging plan (“Plan”), initially approved by the Commission in Case No. 09-00321-UT and continued in Case Nos. 14-00190-UT and 19-00187-UT, to manage its fuel and purchased power costs by entering into certain forward market transactions, and for such approvals, authorizations and variances that may be required in connection with the Plan (“Application”).

2. PNM is requesting that the Commission approve the continuation of its Plan to participate in forward gas and electric markets by engaging in forwards and futures transactions through 2029, provided that the Company would be allowed to enter into forward transactions under the Plan that will not close until the end of 2030. Forward markets are the markets for month-ahead or longer term, which could be up to two to three years ahead. PNM states that its

ability to participate in forward markets has enabled it to improve the management of its fuel and purchased power costs, reduced volatility in fuel and purchased power expenses and provided other benefits to customers. PNM proposes to continue to flow the benefits, as well as the costs, of the Plan to PNM's retail customers through the Company's Fuel and Purchased Power Cost Adjustment Clause ("FPPCAC"). The Company states that no change is being sought in its base electric rates.

3. Specifically, the Plan involves PNM's participation in the forward markets for the month-ahead and the longer term in order to conduct the following activities:

a. to procure natural gas and energy in the forward markets to serve jurisdictional load, including:

i. procurement of natural gas fuel for generation at PNM's gas-fired generation plants during the current calendar year and for up to two calendar years in advance at a price set either by contract or the use of financial instruments; and

ii. procurement of electricity through purchases during the current calendar year and for up to two calendar years in advance at a price set either by contract or the use of financial instruments; and

b. to enter into off-system sales in the forward markets to enhance margins benefiting jurisdictional ratepayers, including:

i. off-system sales of anticipated excess energy during the current calendar year and for up to one calendar year in advance at a price set either by contract or the use of financial instruments; and

ii. sales from PNM's gas-fired generation plants for fixed-margin, "spark-spread" financial transactions during the current calendar year and for up to one calendar year in advance.

4. PNM has requested the expeditious consideration of its Application so that the benefits of the Plan can continue to be provided to customers uninterrupted.

5. Further information regarding this case can be obtained by contacting PNM or the Commission at the address and telephone numbers provided below. The Commission has assigned Case No. 24-00238-UT to this proceeding, and all inquiries or written comments concerning this matter should refer to that case number.
